EXAMINER	
DU, THUAN N	

ART UNIT	PAPER NUMBER
2116	

DATE MAILED: 11/02/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.		Applicant(s)	
	10/633,892		LEE, CHUN-LIANG	
	Examiner		Art Unit	
	Thuan N. Du		2116	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Amendment (dated 8/16/2006).
2. Claims 1-16 are presented for examination.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

4. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fung (U.S. Patent No. 6,859,882) in view of Opreescu et al. [Opreescu] (U.S. Patent No. 5,842,027).
5. Regarding claim 1, Fung teaches a blade server performance method for use on a blade server including a cluster of server modules [col. 6, lines 44-48], each server module being capable of offering at least two different operating modes [col. 21, lines 20-54], for providing a performance management function on the clustered server modules in the blade server [col. 21, lines 20-54];

the blade server performance management method comprising:

performing a power-load detecting procedure to detect a current distribution of power load by a power supply of the blade server to the clustered server modules in the blade server [col. 16, lines 8-17];

performing an operating mode inspecting procedure to inspect current operating modes of the server modules to find a highest-performance server module (the determination of which

Art Unit: 2116

server module should enter mode 3 state to reduce power consumption implicitly including a determination that server module is currently in a higher power consumption mode) [col. 21, lines 20-54]; and

performing a power-initiated operating mode adjusting procedure to switch a highest-performance server module to a lower level of operating mode [col. 21, lines 20-54].

Fung does not explicitly teach a detection of the current distribution of power load to the clustered server modules is below a rated power level.

Oprescu teaches the determination whether the current distribution of power load to the components is below a rated power level [col. 8, lines 1-65].

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the teachings of Fung to include the determination whether the current distribution of power load to the components is below a rated power level as taught by Oprescu. The modification would increase the flexibility and reliability of Fung's system by allowing the system switches the server module to a lower power consumption state not only to conserve power but also to protect the system (when the current distribution of power load to the clustered server modules is below a rated power level).

6. Regarding claims 2-3, Fung teaches that performing a temperature-initiated operating mode adjusting procedure to switch an overheated server module to a lower level of operating mode [col. 24, lines 25-41].

7. Regarding claims 4-5, Fung teaches that the clustered server modules include a plurality of operating modes [col. 21, lines 20-54].

Art Unit: 2116

8. Regarding claims 6-16, they do not teach or further define over the limitations recited in the rejected claims above. Therefore, claims 6-16 are also rejected as being unpatentable over Fung in view of Oprescu for the same reasons set forth in the rejected claims above.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan N. Du whose telephone number is (571) 272-3673. The examiner can normally be reached on Monday-Friday: 9:30 am - 6:00 pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rehana Perveen can be reached at (571) 272-3676.

Central TC telephone number is (571) 272-2100.

The fax number for the organization is (571) 273-8300.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).
